

**Shipping your Puppy There is a \$ 250.00 fee for shipping your puppy.**  
**I ship counter to counter or cargo. I highly recommend to everyone that shipping counter is favored over sending puppy to Cargo area. When the airline arrives with your puppy it will be taken inside ticket agent counter.**

I use all major airlines for shipping your puppy. Your puppy must be at least 8 weeks of age to be shipped the ideal age is 10 weeks of age. When shipping a puppy it must be approved by a licensed Veterinarian. A Health Certificate must be issued by a licensed Veterinarian and be no more than 10 days old. Animals may not be brought to the airline more than 4 hours before a flight. Animals less than 16 weeks of age must be offered food and water if transit is more than 12 hours. Older animals must have food at least every 24 hours and water at least every 12 hours. Animals

### **Things to Consider**

- If shipping international (including Hawaii) check the quarantine laws.
- Do not give your pet solid food in the six hours before the flight.
- Do not give your pet sedation without your veterinarians approval.
- Try to schedule a non-stop flight and avoid heavy travel times.
- If you are flying with your pet, be sure to tell the flight attendant or pilot.

Place a familiar blanket, or your pets favorite toy in the kennel. **Airlines that Ship Pets**
